ABOUT

Motivated Computer Science student with strong Python programming skills and foundational knowledge in game development concepts, including OOP, UI design, debugging, and animation. Eager to apply technical abilities and logical thinking to develop engaging games and enhance user experiences as a Python Game Developer.

EXPERIENCE

Python Game Project (Academic)

Szabist University

Designed and developed a basic 2D game using Python, implementing gameplay mechanics such as movement and collision detection.

Applied object-oriented programming concepts to optimize game logic and performance.
